

Flask-JWT-Extended further reading

Congratulations on reaching the end of this section!

To learn more about Flask-JWT-Extended and JWTs in general, I have two links for you:

- The official [Flask-JWT-Extended](#) documentation is a great place to start if you want to learn further about what it can do.
- The [RFC for JWTs](#) can also be interesting, to learn more about how JWTs are defined.

You're getting into some advanced territory now!

Happy coding!
