

# Access the code for this section here

Hello!

Throughout the course, we are going to be writing a lot of code.

I always recommend that you **type the code alongside the video**, so you learn as quickly as possible. Writing code truly is the best way to learn!

However, sometimes you'll want access to the code we're typing. This may be to refresh your knowledge, or to check whether you've made a mistake.

The code for this section is available  
here: <https://github.com/tecladocode/python-refresher>

As you go through the section, go back to the code every now and then to check that what you are writing is indeed correct!

Kind regards,

Jose
