E-book: complete review of the API so far

Hey guys!

For our newest course we have written a short e-book which gives you a review of the app we've built in this course.

We thought it might be handy to share here as well, since it may serve as a useful reference for you!

Here's a link to it: https://arac.tecladocode.com

If you're interested in the new course, check out the bonus lecture at the end of this course!

Kind regards,

Jose
